# G DATA
AntiVirus 2008

The anti-virus king continues to expand its number one position: **G DATA AntiVirus 2008** (formerly AntiVirusKit) offers even more thorough virus detection for the best possible protection for your computer.

Complete PC performance with 100% protection!

Comprehensive security

- Protects all communication channels (e-mail (POP3 / IMAP), instant messaging (MSN, Yahoo, AOL, etc.), HTTP)
- **Improved protection from viruses, worms, rootkits, spyware, dialers, Trojans, backdoors, and more**
- Searches all compressed files and archives
- **Resource-saving new user interface**

Cutting edge technology

- **DoubleScan:** best, award-winning virus detection
- **OutbreakShield:** Immediate protection against new viruses
- **Quickest reaction to new virus attacks**
- Also for 64-bit Windows systems
- G DATA BootCD will find loaded rootkits

What's NEW:

- ■ Award-winning virus detection improved yet again
- ■ **Best protection against unknown viruses**
- ■ **Quickest reaction to new virus attacks**
- ■ **Noticeably less system load**
- ■ Virus scan like a screen saver: Virus scan starts during pauses, and pauses when you need your computer.

High tech fully automatically

- **E-mail virus blocker for Outlook, Outlook Express, Mozilla, Eudora, and more**
- Virus blocker for instant messaging (MSN, Yahoo, AOL, etc.)
- Automatically scans HTTP traffic
- **System protection monitors Registry and Hosts file**
- Fully automatic virus scans and updates

Updates & PremiumSupport

- New detection updates every minute
- Virus signatures, software updates and upgrades are included for one year
- **Technical support by e-mail and phone**
- **InternetAmbulance analyzes suspicious files**

System requirements:

- PC with Windows Vista, Windows XP (as of SP2), or Windows 2000 (as of SP4)
